

## FEATURES

They are mainly used for stuffing boxes:

Stuffing box braiding is used to seal rotating, reciprocating or helical movements. Its principle of operation or sealing is obtained thanks to the force produced by an external support.

### MATERIALS:

- PTFE braiding
- Graphite braiding
- Fibreglass braiding
- Aramid fibre braiding

### SECTORS THAT USE THIS TYPE OF JOINT:

- Agriculture
- Food
- Pharmaceutical industry
- Petrochemical industry
- Automotive
- Nautical
- Steel and materials processing
- Aeronautics...
